| Dual Action Screw<br>for wood & metal structure<br>for SUNTUF Beehive |  | 9025928 |

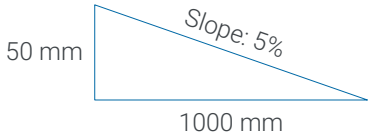

## QUICK TIPS

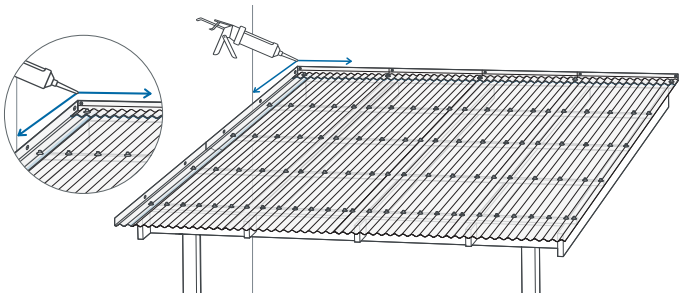

Use foam tape to
reduce friction and noise.

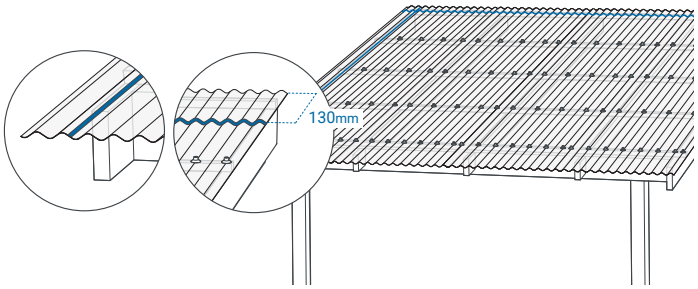

Printed tape facing up & pre-drill Ø10 mm holes before fastening.

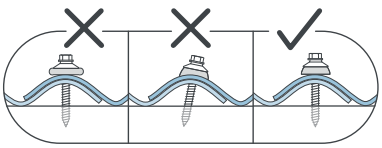

This minimum slope will ensure proper
water runoff and keep the roof panels clean.

Use UV—resistant silicone suitable for polycarbonat

Use butyl sealing tape between the
sheet and the wall trim/ ridge cap accessory.

Avoid overtightening
